Re: Manawa Ora Team Ventilator

To whom it may concern,

I, Dr Lance F Faber, as the clinical expert on ventilation on this team, hereby attest that the ventilator design submitted by the Manawa Ora team for the Code Life Ventilator Challenge could be used for emergency ventilation of a Covid-19 patient given an adequate supply of medical grade compressed air and oxygen.

Sincerely yours,

Dr. Lance F Faber DO DABR MCNZ #60196
